YOUR TECH-PART IN OUR TEAM

- Sports betting – and especially the data behind it – is your passion. You bring a strong background in sports or sports-related products (ideally sports betting) and are eager to keep expanding this expertise
- This drive enables you to develop concepts and requirements that unlock the full value of our sports and customer data
- You have hands-on experience with data modeling, data streaming, semantic models, and KPI standardization
- Supporting data-driven decisions, while advising on and challenging data definitions, granularity, latency, and quality, is part of your daily routine
- Excellence in harmonizing stakeholder needs, leading cross-functional alignments that bridge departments and translate outcomes into clear measures and targets
- Contribution to our product strategy and roadmap by taking end-to-end ownership of initiatives: planning resources, refining user stories, gathering stakeholder requirements, evaluating feedback, and tracking status updates

YOUR TECH-STACK

- Background in sports or sports-related products (e.g. sports betting) is required
- Technical education, ideally HTL, university, FH, or equivalent
- Practical experience with data processing, streaming, messaging, real-time DWH, Power BI & reporting
- Strong expertise in agile product management & Scrum
- Experience in requirements engineering preferred
- Communicative and solution-oriented, with a strong analytical mindset
- Very good written and spoken English required; German is an advantage
